

Florida State University School of Dance
Black Box
Repertory Lighting Plot
 As of July 1, 2019
 Designed and drawn by: J. Russell Sandifer
 rsandifer@fsu.edu
 Scale: 1/2" = 1'0"

- Black Box Lighting Policies:**
- Performance lighting is to be used for authorized projects and personnel only.
 - Authorized projects will include:
 - MANCC artists with projects requiring lighting support.
 - Showings, lectures, etc. for MANCC artists or School of Dance purposes.
 - School technology or production classes, or special events (telemetric sessions etc.).
 - School and MANCC artist rehearsals needing special lighting for development of the work. These must be approved by the production staff for School of Dance works and by the MANCC staff for MANCC artists.
 - School or MANCC photo shoots.
 - To become authorized, please see The School production staff. You will need brief training on:
 - Control console operation
 - What is available
 - Safety
 - Lighting instruments indicated on this plot may not be refocused or repositioned.** You may add additional units.
 - Stage lighting is to be used only when you need it. Please use the fluorescent work lights instead when ever possible. Work light switches are just inside and to the right as you enter. Two switches control most fluorescents and the third switch runs a small number of emergency lights.
 - Before turning on the stage lighting system please walk the space and make sure that nothing flammable is coming in contact or within 18" of any lighting instruments. Please check the boom positions especially.
 - Never leave the system on and unattended.
 - When you are ready to leave, be sure to release all captured or parked channels and dimmers, clear cue faders, turn off the lighting control console and replace the dust covers for the console and monitor. (Sound system stays on).
 - If you have questions, please consult a member of the staff or consult the lighting binder hopefully found next to the console.
 - Lit performance space is roughly 34' wide x 24' deep.

Instruments	Num In Inventory	Used	Remaining
ETC Source 4 Zoom 25° - 50°	25	24	1
ETC Source 4 50°	23	8	15
Altman 6" Fresnel	49	21	28
